

Aperture Ventures Summit & TekSummit

AGENDA For the Month of April 2026

Jointly Hosted by Aperture Venture Studio, GAO Tek Inc., GAO RFID Inc.,
GAO Research Inc.

Integrating Tactical Mobile Command & AI-Driven Surveillance for Critical Infrastructure and Emergency Response

Jan Ortega

Founder & CEO of ORVIWO LLC

Wednesday, April 01, 2026

Eastern: 1:00pm - 2:30pm

Pacific: 10:00am - 11:30am

Central European: 7:00pm - 8:30 pm

Presentation Language:
English

Target Continents: North America, Europe, Australia, Asia

This session will explore the convergence of AI-powered video surveillance, IoT, and tactical mobile command solutions for mission-critical operations. Drawing from real-world deployments in the Caribbean and Latin America, I will discuss how cloud-managed platforms, rugged computing, and resilient connectivity (5G, satellite, and hybrid WAN) can enhance situational awareness, streamline decision-making, and ensure operational continuity during emergencies.

Real World AI Solutions for the C-Suite: A Financial Lifeline for Medicaid Health Plans

Cut through the noise of disconnected, one-off AI solutions. In this session, we'll explore how leading Medicaid health plans are implementing enterprise-wide AI strategies that deliver measurable financial and operational impact.

You'll hear real-world examples of how plans have:

- Reduced Medical Loss Ratio (MLR)
- Dramatically lowered operational costs
- Prevented fraud, waste, and abuse (FWA)
- Strengthened compliance in an evolving regulatory landscape
- In today's challenging financial environment, AI isn't just a tech trend — it's a strategic lever. Learn how to unlock its full potential as a scalable, secure solution that delivers where Medicaid plans need it most.

Target Continents: North America, Europe, Australia, Asia

AI in Action: Transforming Industries with Video AI.

This session explores how AI-powered video AI solutions are transforming industrial operations across sectors such as manufacturing, warehousing and logistics, aviation, aerospace, and large-scale infrastructure. Drawing from real-world deployments with global enterprises like DP World, GMR, and Pratt & Whitney and more, the session will showcase scalable AI solutions designed to enhance operational efficiency and automation, health, safety and environment (HSE) automation, security and surveillance, and traffic management.

The discussion will further focus on strategies for deploying AI at scale in complex industrial ecosystems, emphasizing the critical role of human-led innovation in ensuring successful adoption and long-term sustainability. Participants will also gain insights into how existing video data infrastructure, ranging from camera networks and drones to handheld devices (smartphones, tablets) can be enhanced with intelligent monitoring systems to improve efficiency, strengthen safety, ensure regulatory compliance, and optimize overall operations.

Ella Young

MBA CEO & Founder,
Ellectrify

Luxury Wellness Innovation: The Future of Grounding and PEMF Technology

Explore the future of luxury wellness through grounding and PEMF technology. Learn how Ellectrify's innovative, patent-pending products redefine holistic health, enhance recovery, and improve sleep, while navigating market trends and consumer adoption strategies.

In an era where health and wellness innovation is at the forefront, grounding and Pulsed Electromagnetic Field (PEMF) technologies are emerging as transformative solutions. This session will explore how luxury wellness brands can harness these cutting-edge modalities to enhance holistic health, improve sleep quality, accelerate recovery, and promote overall well-being. Drawing from Ellectrify's experience in developing patent-pending grounding products, attendees will gain insights into the integration of high-conductivity materials, user-centered design, and advanced technology in delivering unparalleled wellness experiences.

The session will also examine market trends, consumer adoption strategies, and

the intersection of wellness, technology,
and lifestyle, offering a comprehensive
blueprint for next-generation luxury
health solutions.

About Aperture Ventures Summit & TekSummit

Aperture Ventures Summit – Advancing AIoT Innovation and Industrial Transformation

Aperture Ventures Summit is a curated global summit series focused on advancing **Artificial Intelligence (AI), the Internet of Things (IoT), and Artificial Intelligence of Things (AIoT)** through real-world industrial and enterprise applications. The summit brings together AI leaders, IoT experts, industrial innovators, startup founders, researchers, corporate partners, and technology practitioners to exchange ideas, showcase AIoT systems, and foster meaningful collaboration.

Unlike traditional conferences, Aperture Ventures Summit operates as a continuous engagement platform featuring ongoing expert sessions, technical showcases, and collaborative discussions that highlight practical AIoT implementations across diverse industries.

Key Focus Areas

- AI for industrial and enterprise systems
 - IoT architectures, connectivity, and edge computing
 - AIoT system design and deployment
 - Computer vision, predictive analytics, and automation
 - Digital twins and intelligent operations
 - Industrial IoT security and interoperability
 - Smart manufacturing and connected infrastructure
-
- 

-
- 
- Scalable AIoT solutions for real-world environments
 - Cross-industry AIoT applications and best practices

Summit Experience

- Expert presentations from AI, IoT, and AIoT thought leaders
- Real-world AIoT system showcases and demonstrations
- Technical discussions on emerging technologies and industry trends
- Knowledge sharing, collaboration, and professional networking
- Exploration of practical AIoT solutions for industrial and enterprise transformation

TekSummit: The Premier Global AI, IoT & Emerging Technologies Summit

The GAO (Global Advanced Operations) Group launched **TekSummit** in 2021, and it was an immediate success. The event was successfully held in 2021, 2022, and 2023, featuring hundreds of distinguished speakers and thousands of attendees from around the world. TekSummit was paused in 2024 and 2025 to allow the organization to focus on its rapidly growing businesses.

In 2026, **TekSummit** returns as a premier global online event and is jointly hosted with **Aperture Ventures Summit**. Together, the two platforms bring AI leaders, IoT experts, industrial innovators, researchers, technology professionals, startup founders, and corporate partners together to exchange knowledge, showcase innovative solutions, and explore real-world applications of AI, IoT, and AIoT technologies. Through expert-led sessions, technical discussions, and collaborative networking, participants will gain valuable insights into emerging technologies and their practical implementation across industries.

SPEAKERS

FOR THE MONTH OF

April 2026

Integrating Tactical Mobile Command & AI-Driven Surveillance for Critical Infrastructure and Emergency Response

Jan Ortega

Founder & CEO of ORVIWO LLC

Biography

Jan Ortega is the Founder & CEO of ORVIWO LLC, a Service-Disabled Veteran-Owned Small Business (SDVOSB) based in Puerto Rico specializing in IT infrastructure, video surveillance & access control, IoT remote monitoring, and tactical communications. With military communications experience in the 156th Communications Squadron's Joint Incident Site Communications Capability (JISCC) team, Jan has led multiple projects integrating AI, rugged computing, and secure networking for government, public safety, and critical infrastructure sectors across Puerto Rico, the Caribbean, and Latin America.

Presentation Title: Integrating Tactical Mobile Command & AI-Driven Surveillance for Critical Infrastructure and Emergency Response

Abstract

This session will explore the convergence of AI-powered video surveillance, IoT, and tactical mobile command solutions for mission-critical operations. Drawing from real-

world deployments in the Caribbean and Latin America, I will discuss how cloud-managed platforms, rugged computing, and resilient connectivity (5G, satellite, and hybrid WAN) can enhance situational awareness, streamline decision-making, and ensure operational continuity during emergencies.

Real World AI Solutions for the C-Suite: A Financial Lifeline for Medicaid Health Plans

Joseph Ancil

Chief AI Officer, healthplans.ai

Biography

Joseph Ancil brings over two decades of leadership in the healthcare sector, specializing in technology management, AI solutions deployment, business process outsourcing, sales, partner management, transformation, and global supply chain management with full P&L accountability.

Currently serving as Chief AI Officer at healthplans.ai, Joseph leads the firm's AI practice, designing and implementing transformative AI strategies that enhance organizational performance and human efficiency. He has pioneered the development of secure, compliant, and scalable AI solutions that integrate seamlessly into healthcare business operations and back-office processes. These “touchless” and “human-in-the-loop” solutions have been instrumental in driving innovation across Enrollment, Claims, and Finance P&L functions.

Previously, Joseph was Chief Procurement Officer at Gainwell Technologies, where he established strategic alliances with Big 4 firms, BPO providers, system integrators, and PaaS/COTS partners to unlock significant growth opportunities. Earlier in his career, he headed the healthcare practice at Tech Mahindra (formerly Satyam), managing key clients across the “3Ps of healthcare” – Payer, Provider, and Pharma.

A committed lifelong learner, Joseph also teaches online courses in AI, Data, Analytics, and Supply Chain Management, and is a sought-after speaker and advisor to schools and technology forums in New Jersey.

Sas Mukherjee

President, Catalyst Solutions

Biography

Sas Mukherjee is a senior executive with over 25 years of leadership experience across healthcare, technology, and services industries. He has a strong track record of driving large-scale transformation, operational excellence, and growth, serving in roles from Board Member to CEO and CFO for both private equity-backed and publicly traded companies.

Most recently, Sas served as CFO at Gainwell Technologies, where he helped stand up the company after a carve-out, led major M&A initiatives, and delivered synergy savings to support growth and innovation for ~60 million Medicaid members. As Chief Executive of the Americas for a Blackstone portfolio BPO company, he expanded healthcare and strategic sectors, culminating in a successful sale. At Kaiser Permanente, he was Divisional CFO and Head of Strategy, playing a key role in enterprise transformation and revenue growth. He also held CFO and strategy leadership positions at York Risk Services Group and Serco Global Services.

Earlier in his career, Sas was a Managing Director at a Big 4 consulting firm, where he advised Fortune 500 companies on globalization, outsourcing, and technology-driven transformation.

Known for his inclusive, empowering leadership style, Sas also serves on non-profit and industry boards and is a frequent speaker and advisor to investors and analyst firms.

Presentation Title: Real World AI Solutions for the C-Suite: A Financial Lifeline for Medicaid Health Plans

Abstract

Cut through the noise of disconnected, one-off AI solutions. In this session, we'll explore how leading Medicaid health plans are implementing enterprise-wide AI strategies that deliver measurable financial and operational impact.

You'll hear real-world examples of how plans have:

- Reduced Medical Loss Ratio (MLR)
- Dramatically lowered operational costs
- Prevented fraud, waste, and abuse (FWA)
- Strengthened compliance in an evolving regulatory landscape

In today's challenging financial environment, AI isn't just a tech trend — it's a strategic lever. Learn how to unlock its full potential as a scalable, secure solution that delivers where Medicaid plans need it most.

AI in Action: Transforming Industries with Video AI.

Varun Bharti

Entrepreneur, Awiros

Biography

Varun Bharti, Entrepreneur, Awiros (www.awiros.com), represents a deep-tech startup pioneering AI-powered video intelligence solutions. Awiros is a Video AI Platform enabling real-time computer vision use cases for large scale automation, trusted by 50+ global enterprises and processing over 2,000 hours of video every hour through 120+ apps.

With over a decade of experience in enterprise technology and innovation, Varun has led collaborations with Fortune 500 companies and regulatory bodies across aerospace, aviation, manufacturing, logistics, data centers and safe/smart cities. His global experience spans Asia, the Americas, Europe, the Middle East, and Africa. Before Awiros, he worked in Sustainability and EHS, consulting organizations on sustainable business transformation. A passionate advocate for AI with real-world impact.

Presentation Title: AI in Action: Transforming Industries with Video AI.

Abstract

This session explores how AI-powered video AI solutions are transforming industrial operations across sectors such as manufacturing, warehousing and logistics, aviation, aerospace, and large-scale infrastructure.

Drawing from real-world deployments with global enterprises like DP World, GMR, and Pratt & Whitney and more, the session will showcase scalable AI solutions designed to enhance operational efficiency and automation, health, safety and environment (HSE) automation, security and surveillance, administration and governance, and traffic management.

The discussion will further focus on strategies for deploying AI at scale in complex industrial ecosystems, emphasizing the critical role of human-led innovation in ensuring successful adoption and long-term sustainability. Participants will also gain insights into how existing video data infrastructure, ranging from camera networks and drones to handheld devices (smartphones, tablets) can be enhanced with intelligent monitoring systems to improve efficiency, strengthen safety, ensure regulatory compliance, and optimize overall operations.

As one of the solution examples, Awiros has launched an AI-powered visual inspection solution with Pratt & Whitney to automate aircraft engine inspection processes, enhancing accuracy, consistency, and operational efficiency

Luxury Wellness Innovation: The Future of Grounding and PEMF Technology

Ella Young

MBA CEO & Founder, Ellectrify

Biography

Ella Young, MBA, is the CEO and Founder of Ellectrify, a pioneering wellness brand dedicated to integrating luxury, innovation, and science in health solutions. With a passion for holistic wellness and cutting-edge technology, Ella has led the development of patent-pending grounding and PEMF products that have redefined the modern approach to recovery, sleep, and overall well-being. Based in Marco Island, Florida, she combines business acumen, creativity, and a commitment to advancing health technology, positioning Ellectrify at the forefront of the luxury wellness market.

Presentation Title: Luxury Wellness Innovation: The Future of Grounding and PEMF Technology

Abstract

In an era where health and wellness innovation is at the forefront, grounding and Pulsed Electromagnetic Field (PEMF) technologies are emerging as transformative solutions. This session will explore how luxury wellness brands can harness these cutting-edge modalities to enhance holistic health, improve sleep quality, accelerate

recovery, and promote overall well-being. Drawing from Ellectrify's experience in developing patent-pending grounding products, attendees will gain insights into the integration of high-conductivity materials, user-centered design, and advanced technology in delivering unparalleled wellness experiences. The session will also examine market trends, consumer adoption strategies, and the intersection of wellness, technology, and lifestyle, offering a comprehensive blueprint for next-generation luxury health solutions.
